

AMENDMENT TO THE SPECIFICATION

Between paragraphs [0029] and [0030], insert a new paragraph as shown below:

Each of the flange segments 50 defines a second flange surface 72 that is located at an end opposite the inclined surface 52. Also, each of the protrusions 60 defines a second protrusion surface 74 that is located at an end opposite the inclined surface 62. The second flange surface 72 and the second protrusion surface 74 are generally parallel to axis A-A.
